				42	38				

The above chart lists the number of suspect votes by district. 'Suspect vote' means the Nevada registrant who voted in the November 3, 2020 Nevada election has an apparent subsequent (later dated) voter registration in California, indicating the voter does not meet Nevada residency requirements for voting (NRS 293.485). Registrations were matched on name and date of birth plus a matching phone number (same phone number in both state's registrations) and/or a matching Nevada address (California registration's mailing address matches the Nevada registration residency address). Matches without phone or address connections have exceedingly rare names and are unlikely to be coincidences.
